

In the continuing effort to alleviate freezing problems, the City of Antigo will be bypassing the Water Treatment Plant and directly feeding the distribution system from the wells.

The water will not be softened during this time. This may continue for several months, until water temperatures rise.

If your water is temporarily discolored, avoid using bleach or whiteners when laundering.

If you have any questions, please contact our office at 715-623-3633 ext. 106.
